Work Experience

CodSoft – Web Development Intern (Remote)

Aug 2024 – Sept 2024

A one-month remote internship where I built and shipped several front-end mini-projects, working with HTML, CSS, and JavaScript under real deadlines and a structured review process.

- Built responsive UI components and landing pages, keeping cross-browser compatibility in mind throughout.
- Submitted work on a task-by-task basis and incorporated feedback from reviewers before each deadline.

Projects

VenueVista

Oct 2025 – Dec 2025 [Live Demo](#)

A web app for discovering travel venues — users can browse listings, compare nearby hotel prices, pinpoint locations on an integrated map, and add their own venues or reviews to help other travelers plan trips.

- **Built using** MongoDB, Express.js, Node.js, EJS, and Cloudinary.
- Implemented property listings, reviews, and content management.
- Deployed on Vercel.

HomieBites

Jan 2026 – Mar 2026 [Live Demo](#)

A marketplace connecting PG-seekers and meal subscribers with verified providers — includes geolocation-based search, an end-to-end booking flow, Razorpay payment verification, and separate dashboards for users, providers, and admins.

- **Tech Stack:** React, Express, MongoDB, TypeScript, Vite, Node.js, Cloudinary, geolib, JWT, bcrypt.
- Implemented property listings, bookings, and real location with map redirecting.
- Deployed on Vercel.

DivineTanyaa

May 2026 – Jul 2026 [Live Demo](#)

A booking site built for a tarot and astrology practitioner — clients can browse services, check pricing and reviews, and reserve a slot through a scheduling system that handles availability and payments end to end.

- **Tech Stack:** React, TypeScript, Vite, Tailwind CSS, Express, MongoDB, Razorpay, Cloudinary.
- Built a server-side slot and blocked-date system, an admin portal for booking management, and automated email confirmations.
- Deployed on Vercel.
